POLICY ON

ENERGY CONSERVATIVE MEASURES

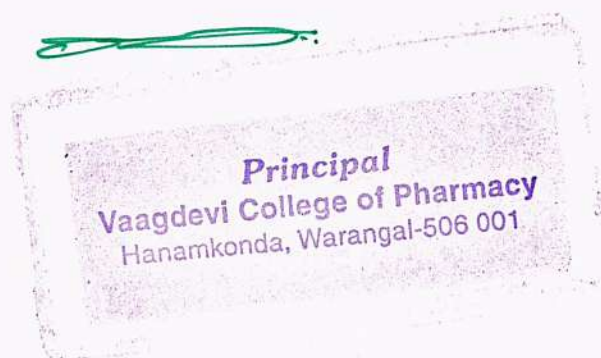

This is to confirm that the institution uses the following alternative energy sources and energy conservation measures: solar energy, wheeling to the grid, sensor based energy conservation and LED bulbs.

Objectives of the Policy

- To preserve resources in campus
- To utilise energy from all sources in an effective manner
- To Use renewable energy sources, such as solar power
- To periodically perform energy audits

i) Solar Energy

Vaagdevi College of Pharmacy introduced Solar Energy in 2019 with a 210 Solar Photovoltaic (PV) with a capacity of 100 KW solar on grid system with net metering capability and capacity of each module proposed is 325 W. In order to use renewable energy, college have solar panels put on their rooftops. At our college, solar technology is used to implement energy conservation measures and for to produce electricity on a large scale. The main electrical grid is connected to a solar PV system to allow power generated by solar panels.

Solar Panels

ii) Wheeling to the Grid

The solar panels send the energy to the Grid during low load conditions in the campus. The Electrical power is wheeled back to the Grid every month after the consumption of solar power in the campus. This helps the Grid in supply the energy to other loads during that period.

Wheeling to the Grid

iii) Use of LED Bulbs/ Power Efficient Equipment

The campus installed with energy efficient LED lamps which will cover the campus. LED-based energy conservation was placed in areas with higher demand, such as the principal's chamber, laboratories, common areas, library and etc.,

iv) Sensor Based Energy Conservation

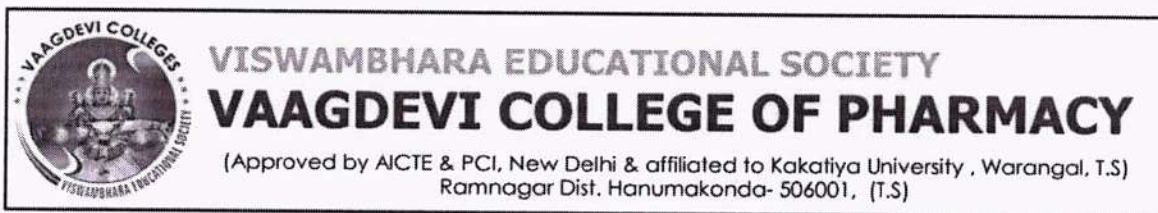

Our college was using the equipments and sensor lights which are saving energy. These measures are taken to conserve energy and utilize alternate source of energy.

POLICY ON WASTE MANAGEMENT

This institute has successfully adopted a well developed waste management system for greater efficiency and sustainability. The following waste management systems are adopted such as solid, liquid, biomedical, e-waste, waste recycling system, hazardous chemicals and radioactive managements.

Objectives of the Policy

- ✓ To use efficient waste management
- ✓ To reduce the production of garbage
- ✓ To adapt waste management procedures

For greater efficacy and sustainability, this institute has successfully implemented an effective waste management system. The essential steps involved in managing waste are listed below.

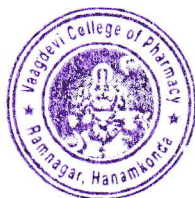

i) Solid Waste Management

For collecting solid waste, several garbage bins have been placed in all departments for collecting biodegradable and non-biodegradable waste through many sources. The GWMC dispose of waste on daily basis. The institution ensures that solid waste is segregated at the source and properly disposed.

ii) Liquid Waste Management

To promote ground water recharge, rain water runoff is managed and collected in to a water harvesting pit. The sewage lines are cleaned and bleached on a regular basis to preserve hygiene. Laboratory liquids never disposed in trash or in storm drains. Any liquid discharge from laboratories in to sewage lines closely monitored ensures that no dangerous compounds escape into the pipes. Waste water is also used for gardening purpose.
