Performance Appraisal System:

Faculty members of Institutions today have to perform a variety of tasks pertaining to diverse roles. In addition to classroom instructions, Faculty members need to innovate and conduct research for their self-renewal, keep abreast with changes in technology, and develop expertise for effective implementation of curricula. Another role relates to the shouldering of administrative responsibilities and co-operation with other faculty, Head-of-Departments and the Head of the Institution. An effective performance appraisal system for faculty is vital for optimizing the contribution of individual Faculty to institutional performance. The goal of the Annual Faculty Performance Review process is to provide a meaningful assessment of faculty productivity, promote the development of goals and expectations, foster and support faculty development and mentorship. In addition to this, the transparent procedure adopted by the college will enable faculty to have set goals for the next year of service at the organization.

The appraisal system will follow the rules and evaluation system which define the evaluation areas to be:

1. Teaching Learning related activities: (i.e., Classes taught, syllabus covered, pass percentage and student responses.)
2. Additional responsibilities: (i.e., administrative responsibilities, examination and evaluation duties, organizing works/ conferences/symposia)
3. Research Publications and academics: (i.e., Research paper publications in journals and conferences, sponsored projects, consultancy, research guidance, fellowship/awards etc.)
