## 1) Restricted Entry of Automobiles

Restricting the entry of automobiles to the campus plays a significant role in reducing both air and noise pollution. By limiting the use of two-wheelers, four-wheelers, and electric bikes to designated parking areas, the campus minimizes vehicular emissions and congestion. The monitoring of vehicle entry and exit through CCTV cameras at key locations, such as the entrance gates, corridors, and parking zones, ensures that only authorized vehicles are allowed on campus. Security personnel enforce the restriction of unauthorized vehicle access at the gates. Additionally, maintaining a no-horn policy within the campus further promotes a quieter, more peaceful environment. This combination of measures contributes to a cleaner, safer, and more sustainable campus.

## **2) Use of Bicycles/Battery powered vehicles:**

In a bid to reduce pollution and promote sustainability, the institution has introduced several measures aimed at creating a greener environment. One of the key initiatives is encouraging students to use bicycles as their primary mode of commuting to the college. This initiative helps reduce the carbon footprint associated with vehicle emissions and promotes a healthy lifestyle among students. To support this environmentally-friendly effort, the institution has provided dedicated parking spaces specifically designed for bicycle parking. This not only ensures that students have a safe and convenient location to leave their bicycles but also contributes to reducing congestion and the need for extensive motor vehicle parking.

### 3) Pedestrian Friendly Pathway

The college is conveniently located near the highway, making it easily accessible. All of the pathways leading to the campus have been thoughtfully designed, cleaned, and aesthetically enhanced to create a more pedestrian-friendly environment. In addition, the pathways are well-lit, ensuring safety for those walking during the evening. Walking is a popular mode of transport, especially because the route from the road to the college building is well-constructed and comfortable. Many teaching and non-teaching staff, along with numerous students from nearby areas walk to the college every day.

#### **4) Ban on use of Plastic**

The initiative to create an ecologically sound environment by prohibiting plastic on campus is a commendable step toward sustainability. Encouraging students to bring jute bags instead of using plastic aligns with eco-friendly practices that contribute to reducing waste and promoting environmental consciousness. The message displayed on the college premises, "PLASTIC FREE CAMPUS and BAN ON PLASTIC AND," serves as a constant reminder to students about the importance of eliminating plastic use. This visible signage can help reinforce the commitment to a cleaner, greener campus. Additionally, the routine reminders about the risks associated with plastic, such as pollution, harm to wildlife, and long-term environmental damage, are essential in shaping responsible behavior. This education can help students understand the broader consequences of plastic consumption and motivate them to adopt sustainable alternatives. By combining visual reminders with ongoing education, the campus is likely to foster a culture of environmental stewardship that extends beyond the college setting into students' daily lives.

### 5) Green Landscaping with Trees and Plants

The Institute is located in a picturesque campus, surrounded by lush greenery and vibrant trees, creating a serene and natural environment. A notable feature of the campus is its exclusive herbal garden, which offers numerous benefits and contributes to the overall well-being of the students and staff. As part of its commitment to environmental sustainability, the college organizes an annual tree plantation drive through its National Service Scheme (NSS) program. This initiative not only enhances the campus's greenery but also extends to nearby villages, promoting eco-friendly practices and raising awareness about the importance of preserving the environment.

Resource person	Dr. M. Baswaraju Associate Professor, Jayamukhi College of Pharmacy.
Report	<p>The presentation of the session was delivered by Dr. M. Baswaraju Associate Professor, Jayamukhi College of Pharmacy, Warangal who provided a perspective from the industry on the issue. According to Dr. M. Baswaraju nanotechnology has many applications in various fields, such as medicine, electronics, energy, and materials. However, nanotechnology also poses some challenges and risks, such as ethical, environmental, and health issues. Therefore, it is important to protect your nanotechnology with intellectual property (IP) rights, which are legal rights that grant you exclusive control over your inventions, creations, or discoveries. According to Dr. M. Baswaraju responding to the rapidly growing global market in nanotechnology, leading Indian companies are investing heavily in nanotechnology product development, while a handful of start-ups are also involved in consultancy, market research, training and product development in nanotechnology. An overview of the nano-patenting activity in India, however, indicates that India is still nascent in terms of nanotechnology investment and patent applications, Finally, his presentation focussed on public-private collaborations in capacity building initiatives as key to harnessing IP and leveraging IP for competitiveness, for the future of nanotechnology in India. Report	<p>Wonderful session was conducted in Vaagdevi college of pharmacy on Start-Up policies in Entrepreneurship for students. The main goal of this programme is to improve the skills in students. The resource person was Dr. Krishna Prasad. The lecture was started with Entrepreneurship promotion and development. Here are some key reasons why such workshops are crucial for students: Entrepreneurship should be one of the major dimensions of the industrial strategy. To facilitate development of an entrepreneurial ecosystem in the organization, specific objectives and associated performance indicators should be defined for assessment.</p> <p>Implementation of entrepreneurial vision at the institute should be achieved through mission statements rather than stringent control system. He said the entrepreneurial agenda should be the responsibility of a senior person at the level of dean/ director/ equivalent position to bring in required commitment and must be well understood by the higher authorities. Resource mobilisation plan should be worked out at the institute for supporting pre-incubation, incubation infrastructure and facilities. A sustainable financial strategy should be defined in order to reduce the organizational constraints to work on the entrepreneurial agenda. At last he explained the development of entrepreneurship culture which is essential for growth of the country.</p>
