

**7.2.1 Describe two best practices
successfully implemented by the
Institution as per NAAC format
provided in the Manual**

Viswambhara Educational Society
VAAGDEVI COLLEGE OF PHARMACY
(Affiliated to Kakatiya University)

BEST PRACTICES

OF THE

INSTITUTION

7.2.1. BEST PRACTICES IMPLEMENTED BY THE INSTITUTION

Best Practice 1

1. Title of the Practice: Adverse Drug Reaction (ADR) reporting and Clinical Pharmacist activities are practically implemented in our college

2. Objectives:

Teaching objectives related to the role of clinical pharmacy, particularly focusing on the detection, assessment, and management of Adverse Drug Reactions (ADRs), as well as the training of students in various aspects of clinical pharmacy practice.

1. Detection, Assessment, and Reporting of Adverse Drug Reactions (ADRs):

Ensure students are trained in the identification, assessment, and reporting of Adverse Drug Reactions (ADRs) as part of the Pharmacovigilance Program of India (PvPI).

Encourage active participation in reporting ADRs to relevant authorities such as the Adverse Drug Reaction Monitoring Center (AMC) and the KMC (Karnataka Medical Council). Provide guidance on how to analyze ADRs and contribute to the improvement of medication safety.

2. Hands-On Interaction with Patient Healthcare Systems:

Instruct students on how to directly interact with the patient healthcare system in clinical settings.

Emphasize the importance of making informed decisions regarding prescribed medications, particularly in inpatient settings.

Teach students how to handle complex medication regimens and advise on adjustments based on patient needs and clinical conditions.

3. Training in Clinical Pharmacy Activities:

Principal
Vaagdevi College of Pharmacy
Hanamkonda, Warangal-506 001

- **Ward Round Participation:** Instruct students on how to actively participate in hospital ward rounds, collaborating with healthcare teams to ensure optimal medication management.
- **Patient Counselling:** Train students to effectively communicate with patients, providing clear medication instructions, and addressing concerns regarding their treatment plans.
- **Pharmacist's Interventions:** Teach students to identify potential issues in medication therapy and to intervene when necessary to optimize patient outcomes.
- **Drug Information Services:** Equip students with the skills to provide accurate drug information to healthcare professionals and patients.
- **Medication Chart Review:** Ensure students are proficient in reviewing medication charts to check for discrepancies, potential interactions, and appropriate drug dosages.
- **Drug Interaction and Therapeutic Drug Monitoring (TDM):** Educate students about the importance of monitoring for drug interactions and how to apply TDM to ensure safe and effective pharmacotherapy.
- **Medication History Interview (MHI):** Teach students how to conduct thorough Medication History Interviews with patients, collecting essential data to prevent medication errors.
- **Case Reports and Documentation:** Instruct students on writing case reports and documenting interventions, providing evidence for clinical decision-making.
- **Dispensing of Medicines:** Provide training on proper dispensing practices in the pharmacy, ensuring that medications are dispensed accurately and safely.

3. Context:

The vision of our college is to cultivate highly skilled pharmacy professionals who are equipped to make a significant impact on healthcare within society. We aim to prepare

Principal
Vaagdevi College of Pharmacy
 Hanamkonda, Warangal-506 001

students for a range of crucial pharmacist activities, including active participation in ward rounds, patient counseling, pharmacist interventions, providing drug information, monitoring Adverse Drug Reactions (ADRs), reviewing medication charts, identifying drug interactions, conducting Therapeutic Drug Monitoring (TDM), writing case reports, and managing the dispensing of medicines in the dispensary. Our comprehensive training ensures that graduates are ready to confidently contribute to improving patient care and enhancing healthcare outcomes.

4. Practice:

The curriculum referring to is designed to provide students with a comprehensive practical experience in pharmacy services, particularly in a hospital setting. Here's a breakdown of the activities and training. This hands-on experience is essential for developing the necessary skills for future pharmacists, enabling them to play an active role in patient care and medication management within a hospital setting.

5. Evidence of Success:

"The institution has made remarkable strides in educating students to enhance the healthcare system by training pharmacists. As a result of these efforts, the institution has received letters of appreciation from the Pharmacovigilance Programme of India (PvPI), KMC, and Warangal."

S.No.	Academic Year	Pharmacist Activities				
		ADRs	Intervention	Patient Counselling	Drug Interaction	Medication History Interview
1	2023-2024	350	3480	3480	3480	3480

6. Problems Encountered and Resources Required

At the start of these programs, especially in the hospital setting, we encountered numerous practical difficulties, particularly from the hospital authorities and nursing staff. They

were hesitant to grant us permission for pharmacy students and faculty to participate in ward rounds. There were several occasions where both our faculty and students had to return to the institute due to a lack of cooperation from hospital staff. However, we were able to persuade them by presenting evidence from developed countries that highlighted the positive impact of pharmacist interventions and clinical pharmacy activities in hospitals. These activities have been shown to significantly reduce medication errors, drug interactions, and adverse drug reactions (ADRs), thereby improving patient care and safety.

Best Practice 2

1. Title of the Practice: Academic Profile Monitoring

2. Objectives of the Practice:

Objectives for an academic institution or a particular educational program. These goals are focused on student development, faculty responsibilities, and institutional success. Here's a breakdown of each point:

A. Preserving Records of Student Progress: This refers to maintaining comprehensive records on students' attendance, test results, academic achievements, and extracurricular activities. This would help track their overall progress and identify areas where additional support may be needed.

B. Uploading Lesson Plans for Efficient Curriculum Delivery: This emphasizes the importance of sharing lesson plans for each subject. It allows lecturers to stay on track with the syllabus, ensuring timely completion of the curriculum. By sharing these plans, students can also be better prepared for each class, and lab work can be effectively managed.

C. Parent-Teacher Meetings (PTM) for Performance Discussion: Organizing PTMs or meetings as needed to discuss each student's performance with their parents. This fosters communication between educators and parents, helping to address any concerns and provide constructive feedback to guide the student's learning.

D. Encouraging and Supporting Student Achievement: This goal focuses on motivating and supporting students to aim for excellence in both academics and extracurriculars. Helping them achieve high ranks in various competitions, tests, or events can boost their confidence and open up opportunities for further success.

E. Facilitating Information and Idea Exchange: Encouraging the free flow of ideas and information among students fosters a collaborative learning environment. This

could be in the form of group discussions, forums, or other interactive platforms where students can share knowledge and learn from one another.

F. Initiating Projects and Activities Benefiting the Institution: This involves initiating projects or activities that benefit the institution as a whole. It could be community outreach, innovation projects, or other initiatives that add value to the institution, making it more dynamic and resourceful.

G. Guiding Students toward Professional Success: Monitoring students from the beginning of their course to the point where they are placed in their desired field after completing their studies. This includes providing career guidance, training, and support, ensuring students have the skills and confidence to enter the professional world in their chosen area.

3. **Context:** The importance of curriculum topics, systematic planning, and effective teaching in fostering student interest is crucial for improving overall attendance and enhancing the learning process. By structuring lessons thoughtfully, teachers can create an environment that engages students, making the subject matter more accessible and relatable.

4. The Practice

The monitoring system described in your text is a structured approach aimed at ensuring the smooth functioning of academic and extracurricular activities within an educational institution.

5. Evidence of success

The academic monitoring system has proven to be highly effective in enhancing the overall quality of education provided to students. It has led to significant improvements in students' self-discipline, regularity, punctuality, and sincerity in their studies. When integrated with other activities aimed at shaping students' personalities, this system has

fostered holistic development. Moreover, the relationship between students and teachers has strengthened, with students feeling more at ease when seeking guidance and support. The positive impact is also evident in the increased participation of students in co-curricular and extracurricular activities. This combination of academic focus and personal growth opportunities has contributed to a more engaging and productive learning environment.

6. Problems encountered and resources required

It seems like you're describing a situation where students faced challenges in reaching college on time due to public transport issues, and some were hesitant to express their concerns. The teachers' efforts to comfort these students and encourage communication are crucial. Here's a refined version of the passage. Some students, especially those from nearby villages, faced delays in reaching the college due to issues with the public transport system. Additionally, a few students felt uncomfortable coming forward to share their concerns. However, the teachers approached them in a supportive and reassuring manner, helping them feel at ease. Regular counseling sessions are essential to encourage these students to openly communicate and actively participate in the activities of their choice.
